FOOD AND CHEMICAL TOXICOLOGY

An International Journal published for the British Industrial Biological Research Association

Editors-in-Chief

GORDON C. HARD, *MRC Toxicology Unit, Woodmansterne Road, Carshalton, Surrey SM5 4EF*

ROBERT A. NEAL, *Center in Molecular Toxicology, Department of Biochemistry, Vanderbilt University School of Medicine, Nashville, TN 37232, USA*

Managing Editor

JILL WHITTAKER, *BIBRA, Woodmansterne Road, Carshalton, Surrey SM5 4DS*

International Editorial Board

M. W. ANDERS, *USA*
H. BARTSCH, *France*
B. A. BRIDGES, *UK*
D. B. CLAYSON, *Canada*
T. F. X. COLLINS, *USA*
F. COULSTON, *USA*
J. W. DANIEL, *UK*
R. DERACHE, *France*
P. S. ELIAS, *Federal Republic of Germany*
V. J. FERON, *The Netherlands*
W. G. FLAMM, *USA*
M. A. GALLO, *USA*
I. F. GAUNT, *UK*
P. GRASSO, *UK*
H. C. GRICE, *Canada*
A. W. HAYES, *USA*
D. HENSCHLER, *Federal Republic of Germany*
X. HUANG, *People's Republic of China*
R. KATO, *Japan*
D. KREWSKI, *Canada*
P. M. NEWBERNE, *USA*
D. V. PARKE, *UK*
A. E. PEGG, *USA*
G. L. PLAA, *Canada*
I. F. H. PURCHASE, *UK*
D. E. RICKERT, *USA*
F. J. C. ROE, *UK*
D. SCHMÄHL, *Federal Republic of Germany*
R. C. SHANK, *USA*
P. S. SPENCER, *USA*
T. SUGIMURA, *Japan*
J. A. SWENBERG, *USA*
R. TRUHAUT, *France*
H. VAINIO, *Finland*
J. H. WEISBURGER, *USA*
J. ZHOU, *People's Republic of China*

Publishing Office

Pergamon Press plc, Journals Production Unit, Hennock Road, Marsh Barton, Exeter EX2 8NE, England
(*Tel.* Exeter (0392) 51558; *Telex* 42749)

Subscription and Advertising Offices

North America: *Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, USA*

Rest of the World: *Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England*

Published monthly

Annual Subscription Rates (1990)

Annual institutional subscription rate (1990) DM 1325.00; 2-year institutional (1990/91) DM 2517.50; personal subscription rate for those whose library subscribes at the regular rate (1990) DM 180.00. Prices are subject to amendment without notice. Members of BIBRA may order personal subscriptions at a concessional rate. Details of these rates are available on request.

Back Issues

Back issues of all previously published volumes, in both hard copy and in microform are available direct from Pergamon Press offices.

Copyright © 1989 Pergamon Press plc

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations that do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the USA

The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying, beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, USA.

Permission for other use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is: 0278-6915/89 $3.00 + 0.00

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

Index of Subjects

Acceptable daily intake of food additives 273
Acetaldehyde hydroxysulphonate subchronic oral toxicity in rats 349
2-Acetyl-4(5)-(1,2,3,4-tetrahydroxy)butylimidazole ability of B_6 vitamers to prevent the lymphopenic effects of 627
Adriamycin effect of coffee on genotoxicity of 787
Alar carcinogenicity of 622
Aliphatic amines precursors of *N*-nitrosodimethylamine, formation after administration of choline and analogues to rats 31
Alkylating intermediates trapping of, using scavenger reagents 475
Alkylation of heavy elements, book review on 550
Allergy risk assessment of contact sensitization 479
Allura Red see FD & C Red No. 40
Aluminium dietary, and Alzheimer's disease 495
Alzheimer's disease and dietary aluminium 495
Amines aromatic, absorption, biotransformation, retention and excretion of 1, 3-diaminobenzene in the rat 741 ... heterocyclic, formed by cooking of protein-rich food 657, 667 ... nitrosation of, and trapping of reactive intermediates 469
Aminoimidazoazaarenes metabolism studies in the mouse 667
2-Amino-3-methylimidazo[4,5-*f*]quinoline metabolism of, in the male rat 369
2-Amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine metabolic disposition in induced mice 667
***p*-Aminophenol** toxicity in the rat 691
Ammonia caramel ability of B_6 vitamers to prevent the lymphopenic effects of 627
Ammonium perfluorononanoate acute inhalation toxicity of 465
Amylase from *Bacillus megaterium*, subchronic toxicity studies in dogs and rats 301 ... from *Bacillus stearothermophilus*, toxicity in dogs and rats 599
***trans*-Anethole** chronic toxicity/carcinogenicity in rats 11 ... histopathological evaluation of proliferative liver lesions in rats fed on 21
Anti-carcinogen indole-3-carbinol, *in vivo* disposition in rainbow trout 385
Antioxidants butylated hydroxytoluene, disposition in humans and rats 765 ... disposition of single oral doses of butylated hydroxyanisole in humans and rats 151
Asbestos toxicology and risk assessment 53
Ascorbate effect on thermal conversion of trimethylamine *N*-oxide to trimethylamine and dimethylamine 613
Atrazine effect on erythroid differentiation of murine erythroleukaemia cells 125
Avocado oils effect on liver characteristics in growing rats 279
Azo dyes toxicity of C. I. Pigment Red 3 in rats and mice 793

Bacon containing nitrite, formation of *N*-nitrosamines in 295
Beer analysis of *N*-nitrosodimethylamine content in 27
Benzimidazoles effect of glutathione, cysteine and diethylmaleate on thiabendazole teratogenicity 177
Benzopyrenes book review on carcinogenicity of 271
Bladder response to indole and sodium saccharin ingestion 777
Brassica vegetables effect on mixed-function-oxidase activity in the liver and intestines of rats 289
Browning products non-clastogenicity in mouse bone marrow 715
Butylated hydroxyanisole biliary excretion in the rat 421 ... disposition of single oral doses in humans and rats 151
Butylated hydroxytoluene disposition in humans and rats 765
B_6 vitamers ability to prevent the lymphopenic effects of ammonia caramel fed to rats 627

Caffeine content of non-alcoholic beverages 49
Cancer book review on role of gut flora in 66
Caramels ammonia caramel, ability of B_6 vitamers to prevent the lymphopenic effects of 627
Carcinogenicity of *trans*-anethole in chronic feeding study in rats 11, 21 ... of benzopyrenes and cyclopenta-[*a*]phenanthrenes, book review on 271 ... of 3,3'-dimethylbenzidine dihydrochloride in mice 801 ... of gentian violet in two-generation study in rats 239 ... of human diet in rats 427 ... of nitrofurazone in rats and mice 129 ... studies of sulphamethazine in mice 455 ... study of FD & C Red No. 40 in rats 701 ... study of magnesium chloride in mice 559
Carcinogens book review on identifying and regulating 415 ... human, IARC monographs 549 ... ranking of 417
Cations effects on urinary parameters and DNA synthesis and morphology of the bladder epithelium in rats 403
Chemical mixtures book review on methods for assessing effects of 549
Chinese food measurement of histamine content of 283
Chlorinated steroids analysis and metabolism of 259
3β-Chlorocholest-5-ene studies on intestinal absorption, distribution and metabolism of, in mice 259
4-Chloroindole nitrosation rate and stability of product 723
3-β-Chlorostigmast-5-ene studies on intestinal absorption, distribution and metabolism of, in mice 259
Choline and choline analogues formation of aliphatic amine precursors of *N*-nitrosodimethylamine after oral administration to rats 31
Cinnamic aldehyde pre-natal toxicity in the rat 781
Cinnamon oil pre-natal toxicity of cinnamic aldehyde in the rat 781
C. I. Pigment Red 3 toxicity in rats and mice 793
Clones book review on gene technology 416
Coffee aroma constituents, mutagenicity of 227 ... inhibition of *in vivo* genotoxicity by 787
Contact allergens immune response to, development of predictive test methods for 755
Contact sensitization risk assessment of 479
Cooking methods effects on the *in vitro* mutagenicity of individual foods 657
Cucurbitacin in traditionally bred squash, food poisoning from 555
1-Cyano-3,4-epithiobutane effect on glutathione metabolism 731
Cyclopenta[*a*]phenanthrenes book review on carcinogenicity of 271
Cyclophosphamide effect of coffee on genotoxicity of 787
Cysteine effect on thiabendazole teratogenicity in mice 117

Datura stramonium seed, toxicological evaluation of 501
Deoxynivalenol dysregulation of IgA production and IgA nephropathy induced by 361

Developmental toxicity book review on mechanisms and risk 139 ... of isomalt in rats 631 ... of succinate tartrates in rats 249
Diacetoxyscirpenol effects on drug metabolizing enzymes in rat tissues 215
1,3-Diaminobenzene absorption, biotransformation, retention and excretion in the rat 741
Diet composition, and effect on tumour rate in rats 427 ... effect of modifications on nutrition and pathology in rats 185 ... for laboratory animals, book review on selection and formulation of 66 ... influence on, and effect of saccharin salts on, urinary parameters in rats 1 ... restriction in rats, effect on pituitary function 97
Dietary protein influence on endogenous synthesis of nitrate and *N*-nitrosamines in the rat 445
Di(2-ethylhexyl) phthalate carcinogenic activity of 275
Diethylmaleate effect on thiabendazole teratogenicity in mice 117
3,3′-Dimethylbenzidine dihydrochioride carcinogenicity in mice 801
Distribution studies of 3β-chlorocholest-5-ene and 3β-chlorostigmast-5-ene in mice 259
Dithane M-45 subacute toxicological evaluation of 531
Domoic acid toxicity of, in mice and rats 377
Drinking-water book review on contamination with trace amounts of hydrocarbons 269
Drug metabolism effect of mycotoxins 215
Dunaliella bardawil safety evaluation as a potential food supplement 221
Dyes 3,3′-dimethylbenzidine dihydrochloride carcinogenicity in mice 801

Environmental chemistry book review on 491
Environmental contamination book review on 550
Environmental toxicology and risks of toxic substances for women and children in developing countries 265 ... book review on biochemical mechanisms and regulation of intercellular communication 140 ... book review on organic pollutants found as trace contaminants in drinking-water 269
Enzymes amylase, toxicity in dogs and rats 301, 599
Erythroleukaemia cells murine, effect of paraquat and atrazine on 125
Eye irritation, method for evaluation of 255

Fats/oils evaluation of jojoba oil as a low-energy fat in feeding studies in rats 35, 45 ... stored, evidence of persistence of agent causing toxic oil syndrome 517
FD&C Red No. 40 teratogenicity study in rats 707 ... toxicity/carcinogenicity in rats 701
Ferrous sulphate effect on thermal conversion of trimethylamine *N*-oxide to trimethylamine and dimethylamine 613
Flavonoids mutagenicity of 437
Flavonol glycosides mutagenicity of 437
Flavourings (see also specific compounds) chronic toxicity/carcinogenicity study of *trans*-anethole in rats 11 ... α,β-unsaturated ketones, reactivities with glutathione 773
Foetotoxicity of *p*-aminophenol in the rat 691 ... of maternally inhaled formaldehyde 545
Food and health, book review on 65 ... and nutrition, book review on dictionary of 65
Food additives acceptable daily intake 273 ... butylated hydroxytoluene, disposition in humans and rats 765 ... cinnamic aldehyde, pre-natal toxicity in the rat 781
Food colourings FD & C Red No. 40, teratogenicity study in rats 707 ... toxicity/carcinogenicity of FD & C Red No. 40 in rats 701
Food contamination meeting report on 553
Food intolerance book review on layman's guide to 139
Food poisoning from cucurbitacin in traditionally bred squash 555
Formaldehyde maternally inhaled, effects on embryonal and foetal development in rats 545 ... two-year drinking-water study in rats 77
Fructose/lysine non-clastogenicity in mouse bone marrow of 715

FOOD AND CHEMICAL TOXICOLOGY

Editors-in-Chief

GORDON C. HARD, *MRC Toxicology Unit, Woodmansterne Road, Carshalton, Surrey SM5 4EF*
ROBERT A. NEAL, *Center in Molecular Toxicology, Department of Biochemistry, Vanderbilt University School of Medicine, Nashville, TN 37232, USA*

Managing Editor
JILL WHITTAKER, *BIBRA, Woodmansterne Road, Carshalton, Surrey SM5 4DS*

Aims and Scope

Food and Chemical Toxicology publishes original research reports and occasional interpretative reviews on the toxic effects, in animals or humans, of natural or synthetic chemicals occurring in the human environment. In addition to studies relating to food, water and other consumer products, papers on industrial and agricultural chemicals and pharmaceuticals are encouraged. The studies may address the physiological, biochemical or pathological changes induced by specific substances, techniques for assessing potential toxicity, or the mechanisms underlying toxic phenomena. All aspects of *in vivo* toxicology are covered, including systemic effects on specific organ systems, carcinogenesis and teratogenesis. Papers reporting the toxicological examination of specific chemicals or consumer products are published irrespective of the positive or negative nature of the results, provided the tests and reporting meet current standards of adequacy. The Journal's editorial policy reflects the need for high-quality science in support of health and safety decisions.

Instructions to Authors

General Information

The Journal's main purpose will be the publication of **papers** reporting and interpreting original toxicological research, particularly studies promoting an understanding of the mechanisms underlying toxic effects or improvements in methods for predicting adverse effects. Papers reporting the toxicological examination of specific chemicals or consumer products will be published, irrespective of the positive or negative nature of the results, provided the tests and reporting meet current standards of adequacy. **Brief communications**, documenting important new findings warranting expeditious publication, will also be considered, as will concise interpretative **reviews** of toxicological topics of contemporary significance. **Letters to the Editor** will be limited to comments on contributions already published in the journal; if a letter is accepted, a response (for simultaneous publication) will be invited from the authors of the original contribution.

Manuscripts should be submitted *in triplicate*, one being the original. Those from the USA and Canada should be sent to the American Editor, Dr R. A. Neal. All others should be sent to the Managing Editor.

Submission of a paper will be held to imply that it reports original unpublished research, that it is not under consideration for publication elsewhere and that, if accepted for *Food and Chemical Toxicology*, it will not be published again, either in English or in any other language, without the Editors' consent.

Manuscript Format

Manuscripts should be typed on *one side of the sheet* only and *double spaced* throughout, with at least 2.5-cm margins. All pages must be numbered, including the *title page*, which should carry the title of the paper, the surnames and initials of the authors, the names and addresses of the institutions where the work was done (with the affiliation of each author clearly indicated) and a short running title not exceeding 45 letters and spaces. Titles consisting of declarative or interrogative sentences are not acceptable. Provision of telephone, Telex and/or Fax numbers will assist the processing of contributions.

Manuscripts reporting original research should be organized in the following sections, each commencing on a separate sheet:

Abstract—a self-contained summary of the objectives, results and significance of the study, not exceeding 200 words. Uninformative sentences such as "the significance of the results is discussed" are not acceptable.

Introduction—a concise and clear statement on the background, purposes and significance of the work.

Materials and Methods—a detailed description of the experimental design and of any new or improved methods. Well-established methods and techniques may be identified by reference only.

Results—presented concisely, with the aid of tables or figures where appropriate. Duplication between this section and the Discussion must be avoided.

Discussion—a succinct interpretation of the data. Extensive literature reviews and highly speculative comment are discouraged.

Acknowledgements—providing recognition of sources of funding and donations of materials, and including any thanks the authors may wish to accord for advisory, technical or other assistance, since authorship should be limited to those who have made a major contribution to the study and to the preparation of the paper. Authors are advised to obtain approval for the wording of any acknowledgement from those whose help is noted.

References—listed in alphabetical order and including the names of all authors of the cited work. References to published papers should provide authors' names and initials, year of publication, full title of the paper, title of the journal (in full,

or abbreviated according to the rules adopted in the *World List of Scientific Periodicals 1963*, Butterworth & Co., London), volume number, and the first and last page numbers of the paper:

e.g. Babiuk C., Steinhagen W. H. & Barrow C. S. (1985). Sensory irritation response to inhaled aldehydes after formaldehyde pretreatment. *Toxic. appl. Pharmac.* **79**, 143–149.

References to books should include authors' names and initials, year of publication, title, edition, appropriate page number(s) and name and location of the publisher:

e.g. Gossel T. A. & Bricker J. D. (1984). *Principles of Clinical Toxicology*. p. 150. Raven Press, New York.

For multi-author books, the names and initials of the relevant authors, year of publication, title of the relevant chapter, title of the book, names and initials of all editors, numbers of first and last pages of the cited chapter, and name and location of the publisher should be given:

e.g. Williams G. M. & Weisburger J. H. (1986). Chemical carcinogens. In *Casarett and Doull's Toxicology. The Basic Science of Poisons*. Edited by C. D. Klaassen, M. O. Amdur & J. Doull. 3rd Ed. pp. 99–173. Macmillan, New York.

Citations of references in the text should give the surname(s) of the author(s), together with the year of publication. For references with more than two authors, the name of the first followed by *et al.* should be cited. For papers with the same author(s) and year, the references should be distinguished in the text and reference list by the letters a, b, etc. following the year. Authors' names must not be typed in upper case in either text or reference list.
References may be listed if they are 'in press', but the journal that has *accepted* the paper for publication must be identified. Submitted papers or papers in preparation should not be listed; such work must be mentioned in the text only, as 'unpublished data' or 'personal communication' (with surnames and initials).

These sections should be followed by the tables in numerical order, each on a separate sheet, and finally by a typed list of the legends to the figures (see below).

Tables and Figures

These must be intelligible without reference to the text and should be planned to fit the page size of the Journal. Tables and figures should be numbered, in arabic numerals, in the sequence in which they are mentioned in the text. The same data may not be reproduced in both a table and a figure. Each table must have a title and on each column there should be a heading that clearly identifies the data therein. Illustrations and diagrams should be kept to a minimum; the figure number must appear only on the reverse side, together with the author's name and an arrow marking the top. Three copies of any half-tones (unmounted and on glossy paper) are required; for line drawings, an original (in black drawing ink on good-quality paper) or a glossy print is required for reproduction, together with two clear photocopies for the referees. No information that can be included in the legend should appear on the figure and the following standard symbols are preferred for line drawings: ▲, △, ●, ○, ⊙, ■, □, ×, ◇. The legends for photomicrographs must state the staining method and magnification. Authors should bear in mind that the figures they submit may be subjected to photographic reduction. The cost for illustrations in colour will be the responsibility of the contributor(s) (an estimate may be obtained from the Managing Editor).

If figures that have already been published under copyright are to be reproduced in the Journal (e.g. in reviews), copies of letters from the holder of the copyright and from the original author, giving permission for such reproduction, must accompany the submitted manuscript.

Footnotes

Title page footnotes should include the definitions of any abbreviations used in the text and any author's current address, if different from that given below the title. Other footnotes, as distinct from literature references, should be avoided in the text as far as possible. When they are essential, they should be identified by the symbols * † ‡ § ‖ ¶, in that order. All the footnotes to the text should be typed on a separate sheet, with an indication of the manuscript page to which the footnote refers.

Nomenclature

The metric system is the standard for all measurements. Test chemicals and enzymes must be clearly identified, wherever possible with the aid of CAS Registry and EC numbers.

Abbreviations

These should be used sparingly; they should be defined when first used in the paper but also listed in alphabetical order under *Abbreviations* as a footnote to the title page (see above).

Page proofs

These will be sent to the first-named author for correction unless an alternative recipient is named on the submitted manuscript. They should be returned (by airmail) to the Editorial Office within 48 hours.

Reprints

A reprint order form will accompany the page proofs. This must be returned to the Editorial Office with the proofs. No payment should be included with the order as an invoice will be sent later.
